WORKSHOP hosted by the 4th International Conference on Hybrid Human-Artificial Intelligence AI, LABOUR AND SOCIETY

The rise of AI, particularly Generative AI, is transforming labor markets, industries, and economies worldwide, raising urgent questions about inequality, job displacement, algorithmic management, and corporate power. This workshop fosters an interdisciplinary dialogue between social scientists, economists, and AI experts to examine AI's impact on labor and society and explore pathways for more equitable and sustainable technological development.

Morning session

9:30 - Session 1: **AI & the Digital Economy**

Chair: GUGLIELMO MEARDI

11:00 - Session 2: **AI & Labor Market Transformations**

Chair: MARIO PIANTA

11:45 - Keynote speaker

DARIO GUARASCIO: **Digital technologies: civilian vs military trajectories**

Afternoon session

14:30 - Keynote speaker

PETTER ERICSON: **A Roadmap for AI Policy Research – Shared Responsibility and Collective Benefits**

15:15 - Session 3: **AI & Democratic Processes**

Chair: FOSCA GIANNOTTI

16:30 - **Focus group on AI, Labour and Society**

All sessions include presentations by authors of both completed research and work-in-progress papers.
